

Competitiveness and efficiency are more important now than ever before in the history of automotive industry. Automotive manufacturers are pressed to keep prices low while coming out with multiple new models that excite the marketplace. This leads to enormous pressure on automotive suppliers. To meet these challenges, suppliers must continually improve product quality while lowering product costs.

One way to meet these challenges is to increase the flexibility of your design, manufacturing, financial, and CRM solutions. With the right technology in place, you can run these systems in ways that will improve operations within your own walls, open visibility in the supply chain, and increase your competitiveness.

Microsoft Dynamics ERP is a well-integrated business solution supporting your business practice. Dynamics ERP can help you gather real-time forecasts from automotive manufacturers, create detailed manufacturing plans and supplier forecasts, react quickly to changes in demand, and summarize real-time and historic data for better business decisions.

AN OPTIMAL SOLUTION FOR:

Dynamics ERP can help you with powerful manufacturing, financial, and CRM solutions that support lean business processes. This can help you shrink development cycles, respond quickly to customer trends, comply with changing regulations, and compete globally.

- Efficient operations management
- Smooth supply-chain operations
- Streamlined engineering
- Responsiveness to market demands
- Innovative integration

Intech's ERP solution for Automotive Manufacturing

Built on the Microsoft Dynamics ERP platform, Intech developed an industry-specific solution for automotive manufacturing. Our solution is a powerful, flexible, low-cost and customizable as per your needs. Our automotive vertical focuses on the following modules:

- Lean manufacturing capabilities
