

The business needs of ceramic industry are ever growing. They need several ways to cater the requirements of Raw Material Producers or miners till end users of the Finished goods. The key points to be taken care of in ceramic industry are reduction of freight and transportation costs, providing on-time delivery and best product quality, capturing Landed Costs, and upturn in margins by reducing the supply chain length.

Most manufacturing solutions are centered around BOM, work centers, and raw materials that are tracked by a single unit of measure—areas that are not pertinent to process manufacturers. In the distinctive process manufacturing arena, you need a solution that fits your unique requirements. The key is a solution as individual as your business, centered on your business processes and functions.

Microsoft Dynamics ERP has established itself as a complete solution that is fast to implement, easy to configure and simple to use. With integrated financial, manufacturing, supply-chain management, sales and marketing, project management, human resources and services management information from across your organization stored in a centralized database, your people can work quickly and effectively – helping to drive your business forward.

AN OPTIMAL SOLUTION FOR:

Dynamics ERP is an optimal solution for your business caters to the specific needs of Ceramic industry like Shaping, Dry Milling & Wet Milling, Glazing, Firing, Dry Pressing and Extrusion, Drying. The standard yet customizable solution can be mapped for other processes too, like Casting, Greenhouse, Glazing, Placing, and Kiln in & out entries, Once-fire sorting, Re-fire sorting and Packaging.

Our solution can help your company to achieve high profitability within limited time using all your resources efficiently.

Intech's ERP solution for Ceramic

Built on the Microsoft Dynamics ERP platform, Intech developed an industry-specific solution for Ceramic. Our solution is a powerful, flexible, low-cost and customizable as per your needs. Our Ceramic vertical focuses on the following modules:

- Demand planning & forecasting
- Capacity planning
- Material resource planning
- Engineering change control
- BOM/Recipe version tracking
- Maintaining levels of inventories
- Input Output ratio optimizations
- Product life cycle management
- Bar code/RFID integrations
- Integration with customer portals for delivery schedules
- Procurement optimizations & vendor management

With our Sure Step Methodology, we make sure that your time, money and efforts in implementing a global ERP solution are minimized.

The Microsoft Dynamics Advantage

Customer is the king. Today, they expect more for less and to fulfill this desire, you should make your business processes as efficient as possible so that you too don't incur any losses. Microsoft Dynamics ERP is a full-fledge business solution that has following advantages over other software:

- ✓ A standard yet customizable solution to fit to your company's specific needs
- ✓ Enabling back office to handle more volume with less staff thus reducing admin cost
- ✓ Any time any device access to get business status and insights on-the-go
- ✓ Manage multiple languages, currencies & country reporting requirements
- ✓ Increase efficiency, reduce costs & minimize errors by automating previously manual processes
- ✓ Shorter billing cycles by integrating field tickets with invoicing
- ✓ Manage growth and expansion more effectively
- ✓ Economical solution with lesser implementation time and cost
