

Chemical industry faces continuous changes majorly due to external regulations related to environment protection. In addition to regulatory requirements, the need to focus on customer demands and to keep pace with ever changing markets means chemical manufacturers need adjustable, robust internal processes, right from manufacturing to sales. These companies need a specialized business solution to manage the way they work.

Manufacturers of chemical products need business solutions that adapt efficiently to new products and markets, protect intellectual property, meet increased obligations of environmental protection and continually adjust to new regulatory requirements. Keeping up with the changes in the competitive market while connecting and optimizing operations are the keys to growth and profits for chemical manufacturers.

Microsoft Dynamics ERP offers you a set modules that allow you to facilitate safe manufacturing, optimize your value creation chain, and improve your entire supply chain. Dynamics ERP will support all your business processes while complying with regulatory and industrial standards and implementing your internal quality guidelines. This makes it easier and faster for your business to become more efficient.

## AN OPTIMAL SOLUTION FOR:

With a Microsoft Dynamics ERP chemical manufacturing solution, you can increase the speed and automation of your manufacturing operations. Your people can smartly manage recipes or formulas, raw materials inventories, by-products, co-products, and yield, which helps to improve manufacturing agility and make the most of every component in the production process.

- Manage complex variables
- Automate and streamline processes
- Make confident decisions
- Connect people with real-time information
- Achieve low total cost of ownership
