

The plastics manufacturing industry is complex and growing. It faces numerous challenges such as stringent compliance and regulatory issues, rising environment concerns, increases energy cost, and shrinking profitability. A large number and variation of clients, distributors, brokers and vendors, minimal margins, and a highly fragmented market have resulted in many complexities to achieve economies of scale. Having the right products, equipment and people in place at the right time is vital to maximize capital utilization and reduce operational expenditure.

Whether the process involves extrusion, injection molding, thermoforming or some other technique, this industry has unique requirements from order to sale. To continually meet the demands and standards, plastic industry requires a standard and comprehensive business solution.

Microsoft Dynamics ERP provides you with a single, flexible platform linking together production, inventory control, customer service and order processing. It is a fully integrated system which helps you streamline operations, improve production, reduce costs and enable real-time visibility into costs, processes, information and metrics. And, it accurately handles your complex buying network with intricate discounts, rebates and commissions to properly motivate and influence these buying groups.

AN OPTIMAL SOLUTION FOR:

Microsoft Dynamics ERP comprises of various modules designed especially for the business needs of plastic industry. Dynamics ERP is optimal for these functions:

- Extrusion
- Casting
- Blow Molding
- Film & Sheet
- Injection Molding
- Fabrication
- Pipe/Profile/Tubing
- Mold/Toolmakers
- Foaming
- Recycling
- Thermoforming

Intech's ERP solution for Plastic Industry

Built on the Microsoft Dynamics ERP platform, Intech developed an industry-specific solution for Plastic industry. Our solution is a powerful, flexible, low-cost and customizable as per your needs. Our plastic industry vertical has the following features:

- Better visibility and accurate cost information to enable better, profitable quoting
- Flexible price, rebate and commission structures
- Unit of Measure flexibility
- Ability to restrict visibility into pricing and costs at product level
- Multiple level BOM support
- Scrap Management
- Formula Management
- Co-products and by-products management
- Lot Traceability and controls to support complete history and audit

With our Sure Step Methodology, we make sure that your time, money and efforts in implementing a global ERP solution are minimized.

The Microsoft Dynamics Advantage

Customer is the king. Today, they expect more for less and to fulfill this desire, you should make your business processes as efficient as possible so that you too don't incur any losses. Microsoft Dynamics ERP is a full-fledge business solution that has following advantages over other software:
