

# How does technology make generating e-Way bills easier?

Dear Readers,

The e-Way bill has been implemented by some states in India for intra-state transportation and in some cases, inter-state as well. E-way bill is a mandatory electronic bill to be generated for transporting the goods exceeding INR 50,000. It's also applicable in the case of inward supply of goods from unregistered person. But how does [technology](#) make your work easier and helps you to manage e-Way Bills?

Technology helps you get rid of manual functions. You can generate an error-free e-Way bill in just few clicks. You have freedom to group invoices based on the mode of transport, vehicle nos., place of supply or State and generate a consolidated e-Way Bill to make life easy for the transporters. You also have a choice to get your e-Way Bills at one go from the portal or for each invoice as you dispatch goods as and when you receive orders.

How will you keep track of transactions of value more than INR 50,000 for which it is mandatory to generate e-Way Bills? Your software will do that for you.

Intech, with Cygnet GSP, assists you in a seamless GST compliance and provides you with the ease of filing multiple GST returns through a single portal, facility of reconciliations and much more.

If you'd like to know more, we're just an [email](#) or a call away.

### Role of ERP with GSP and ASP in the new GST regime

GST is aimed at automatizing the taxation structure in India. To meet the regulatory requirements under GST, tax automation is highly required. If not, the sync between your system and the GST Network (GSTN) system will be very difficult. In this situation, GST Suvidha Provider (GSP) and Application Service providers (ASP) are the significant players in the success [Read More](#)

### Technology is at the core of GST implementation

Technology is used for tax administration since long in India. Then came online filing of returns which further added to our convenience. With the advent of technology, much of our time and efforts have reduced and accuracy has increased. As Indian Government has already passed the GST Law, almost everything of tax structure will require great [Read More](#)
