5 technology trends to be ready for in 2019

Dear Readers,

We all know, 2018 was a year of innovations and evolution in tech. We saw developments in cloud, IoT (Internet of Things), Artificial Intelligence, Virtual Reality, and much more which are just going to grow and develop in 2019 as well. Here are the top 5 tech trends that you should be ready for in 2019:

1. **Accelerated Digital Automation:** 2019 will be more about collaboration of intelligent systems rather than stand-alone automated things. This includes more and more use of robots, drones, applications, vehicles, and agents to automate the tedious and time-consuming tasks.

2. **More Immersive Experiences:** Immersive experiences happens when human capabilities meet AI, Machine Learning, and Virtual Reality. Companies are using remote assistance through digital channels and shifting to a "multimodal" and "multichannel" experience.

3. **Increased AI-Driven Development:** 2019 will see more AI-driven development. The tools which are used to develop AI-powered solution are expanding rapidly. Businesses will use augmented analytics, automated testing, automatic code generation, etc. to speed up the development process.

4. **Expansion of Connected Devices:** The number of IoT devices is expected to reach 30 billion devices by 2020. Many things now come with built-in sensors & Wi-Fi connectivity to connect them to the Internet and to each other. IoT enables devices, appliances, machines, etc. to be connected and exchange data.

5. **Digital Ethics and Privacy:** People are becoming more concerned about how organisations and third-parties are using their personal information. Companies will shift their focus from just data security to Digital Ethics as a whole. Customers' data privacy and security will be of utmost importance.

Intech's solutions on top of Microsoft Dynamics come powered with these digital transformation technologies. Get in touch with our experts to get your business ready for 2019.
