

Capital equipment manufacturers face many challenges. Customers want more variety in the products, for a lower cost, and with a strong performance over the entire life cycle. The products are also complex, including many small and big components sourced from several outside vendors. The main challenge for industrial manufacturers lies in handling all the variety, complexity, and change that continually bombards them.

Success in capital equipment manufacturing requires leaner production, real-time order tracking, and high quality products. To meet these demands, you should have an ability to make decisions based on accurate data and the right manufacturing ERP software is key. An ERP solution must help companies streamline and strengthen their operations in several areas.

Microsoft Dynamics ERP provides you with varied functions designed especially for capital equipment manufacturing companies. This enables you to provide value to customers, gain a competitive advantage, and improve profitability for years to come. Whether you are in lean, discrete, process, semiconductor or mixed-mode manufacturing, Dynamics ERP provides you the agility you need to achieve industry excellence.

## AN OPTIMAL SOLUTION FOR:

Microsoft Dynamics ERP offers capital equipment manufacturing a fully integrated solution with modules of Finance & Accounting, Inventory, Purchase, QC, Manufacturing & CRM on familiar platform with high user acceptability, using a consistent technology and user interface. It caters to the need of heavy machineries & industrial equipment manufacturing companies with greater flexibility.

Dynamics ERP can help your company to achieve high profitability by understanding specific needs of your industry and realigning to these requirements.
