

Print & Packaging industry produces solutions that provide security, protection, convenience and marketing to the world. But the requirements of manufacturing are equally challenging. Print & packaging industry needs detailed lot traceability, accurate part labeling and production flexibility. This industry is going beyond just boxes, bottles, containers and packs and is creating more sustainable, thinner, stronger products and that too using less material than ever before.

To become successful in this ever-evolving industry, you will need a print and packaging specific software that rightfully fulfils your business needs.

Microsoft Dynamics ERP for print and packaging gives you control over your business with access to real-time data. With access to real-time inventory levels, you can adjust your forecasts and inventory to help ensure adequate supply for demand.

Microsoft Dynamics ERP also provides lot tracking, Specification management and production statistics reporting so you can detect and address problems early and consistently produce high-quality products.

This will help you face the future and succeed today.

## AN OPTIMAL SOLUTION FOR:

Dynamics ERP is designed for both traditional and digital printing businesses and will work as a catalyst for change in your business functions.

- Precise modelling of production
- Automatic generation of complete production orders
- Management of stamping dye moulds and printing plates
